

## We have new hosting :)

We gave up using edomenii's services and we are using hostgator now. They are really impressive , top notch support you can't get wrong with them. Huge web space and crazy traffic for a 7\$/month tax , can you believe that ? I've done a research over the internet and i end up with them because it is true ... they rule ! Check out [HERE](#) and you will be a winner fo sure :)
